Minimally Invasive Urologic Surgery

Dedication

As in any endeavor many talented, dedicated people are involved and to single any one person out would misrepresent the total effort involved in this undertaking. Let it suffice that we thank Leonardo da Vinci, Galileo, and Albert Einstein, all of whom met with resistance in their undertakings but who persisted and succeeded because of their love and passion for their studies. Let us continue to make the reach greater than the grasp for the past, present, and future of this field we call endourology.
